Claim Rejections - 35 USC § 103

Claims 1,2,4-23,25,27,28,30-37 and 40-49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gertzon in view of Kuhar '100.

Gertzon discloses an upper channel 10 and a lower member, either the lowest slat or a well known bottom rail, suspended by primary lines 33 and secondary line 17, four pulleys 34,35, over which the cords traverse, as well as numerous guides, unnumbered, that guide the cords. The location of the connection between lines 33 and line 17, as well as the movement of the connection over pulleys, is clearly an obvious design modification based on headrail size, blind length, number of pulleys, etc. What is not shown is the dual rotors and spring retraction system. However, such is well known in the art, as illustrated by Kuhar. It would have been obvious to modify Gertzon by replacing the hanging portion of the manual, exposed, pull cord end 17 with the retraction means taught by Kuhar so as to create a balanced system as well as to remove the danger inherent in the hanging cord 17. The location of the dual rotor member would be at the cord lock 13,14,16, etc. As seen in Fig.2, the cord lock only accommodates one cord, 17, This indicates that the connection does not reach the cord lock and consequently would not reach the dual rotor member taught by Kuhar.

Response to Arguments

Applicant's arguments have been fully considered but they are not persuasive. The dual rotary members taught by Kuhar would logically been located in place of the cord lock 13,14,16, etc., which, as shown in Fig. 2 only accommodates one cord, 17. Consequently, the connection would not traverse this rotary member.

Art Unit: 3634

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Blair M. Johnson whose telephone number is (571) 272-6830. The examiner can normally be reached on Mon.-Fri., 6:30-3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Chilcot can be reached on (571) 272-6777. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
